1. Claim 15 has been canceled in the amendment received on 12/23/2002.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-10, 12, 13 and 33-39 are rejected under 35 U.S.C. 102(b) as being anticipated by McCormack (US 5,695,868) substantially as set forth in Paper no. 10. Table 1 of US'868 reads on the weight ratio limitation set out in the claims.
4. Claims 1-10, and 33-39 are rejected under 35 U.S.C. 102(b) as being anticipated by anticipated by WO 99/47590. WO'590 discloses a film segment **12** comprising a microporous LLDPE film having calcium carbonate particles (page 13, lines 9-10). WO'590 further discloses a bonding agent added within a segment wherein the bonding agent is disclosed in US Patent No. 5,695,868 to McCormack (page 16, lines 23-25). Table 1 of US'868 reads on the weight ratio limitation set out in the claims.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1771

6. Claims 1-4, 6-14, and 33-40 are rejected under 35 U.S.C. 103(a) as being unpatentable over McCormack et al (US 6,015,764). McCormack US'764 is silent as to the weight ratio of the styrenic block copolymer to LLDPE. However, such a variable would have been recognized by one skilled in the art to control the degree of the stretchability and the water vapor rate transmission rate of the film such that the film stretchability increases with increasing amount of the styrenic block copolymer and the water vapor rate transmission rate of the film decreases with the increase in styrenic block copolymer. As such, in the absence of unexpected results, it would have been obvious to one having ordinary skill in the art at the time the invention was made to employ the claimed ratio weight of styrenic block copolymer to LLDPE since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233.

#### ***Response to Arguments***

7. Applicant's arguments with respect to claims 1-14, 33-40 have been considered but are moot in view of the new ground(s) of rejection.
8. The 102/103 art rejections over McCormack et al (US 6,015,764) have been overcome by the present amendment.
9. The art rejections over McCormack et al (US 5,695,868) and WO 99/47590 have been maintained for the following reasons. Table 1 of US'868 shows the film comprising 15 wt% bonding agent and 20 wt% LLDPE. Likewise it is apparent

Art Unit: 1771

that the weight ratio of the bonding agent to LLDPE is  $\frac{3}{4}$ , meeting the specific range required by the claims.

***Conclusion***

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
